FOR ENGINEERING AND SCIENCE

Use of CD-ROM for Highway Design (adapted from NSPE Case No. 98-3)

Year

1999

Description

A chemical engineer thinks about offering services in facilities design and construction, which he would perform with the help of a computer program.

Body

Alexis is a chemical engineer with no facilities design and construction experience. She receives a solicitation in the mail for a new Highway Design CD-ROM. This program allows engineers to do highway design even if they know little or no fundamental concepts in this area.

- Should Alexis order the CD-ROM and begin to offer facilities design and construction services?

[NSPE Code of Ethics](#) An earlier version may have been used in this case.

Notes

See the original NSPE case at: [Use of CD-ROM for Highway Design - Case No. 98-3](#).
