

# Letter Report: Protecting Participants in Behavioral and Social Science Research

### Author(s)

**Anonymous** 

Year

2002

### **Body**

"This letter provides the panel's initial recommendations on four topics: protection of confidentiality of information obtained from human research participants; requirements for informed consent, particularly for advance written consent; procedures for determination of exempt research and for expedited review of low-risk research; and system-level issues, such as training of researchers and accreditation."
