# Forum on Proposed Revisions to ABET

## Author(s)

Anonymous

## Body

On February 16, 2016, the National Academy of Engineering held a forum to discuss proposed changes to criteria used by ABET (formerly the Accreditation Board for Engineering and Technology) to accredit engineering programs in colleges and universities around the world. The Forum on Proposed Revisions to ABET Engineering Accreditation Commission General Criteria on Student Outcomes and Curriculum (Criteria 3 and 5) convened a variety of stakeholders in the education of engineers, including representatives of universities, industry, and professional organizations. The presenters and attendees discussed the proposed changes and related issues such as a perceived lack of communication surrounding the development of the proposed changes and the degree to which the criteria prepare engineering students for jobs after graduation. This report summarizes the presentations and discussions from this forum.
