2019

Body

On October 24, 2018, the National Academies of Sciences, Engineering, and Medicine held a workshop titled *Artificial Intelligence Applications for Older Adults and People with Disabilities: Balancing Safety and Autonomy*. This workshop examined the state of the art and knowledge about artificial intelligence and explored its potential to foster a balance of safety and autonomy for older adults and people with disabilities who strive to live as independently as possible. This publication summarizes the presentations and discussions from the workshop.
