A Health Equity Approach to Obesity Efforts: Proceedings of a Workshop - in Brief

Author(s)

Anonymous

Year

2019

Body

On April 1, 2019, the National Academies of Sciences, Engineering, and Medicine held a public workshop, A Health Equity Approach to Obesity Efforts, in Washington, DC. The workshop explored the history of health equity issues in demographic groups that have above-average obesity risk, and considered principles and approaches to address these issues as part of obesity prevention and treatment efforts. Speaker presentations addressed three areas: current policies and practices that either perpetuate health inequities or advance health equity; mechanisms to support community-driven solutions that can influence the social determinants of health; and approaches for fostering multisector collaboration to address disparities by exploring the issues related to the creation, implementation, and evaluation of equity-oriented programs, policies, and systems changes. Participants also discussed research needs to inform and mobilize equity-centered obesity prevention and treatment actions. This publication briefly summarizes the presentations and discussions from the workshop.
