

List of Environmental Legislation and Agencies

Author(s)

Anonymous

Description

A list of legislation and agencies involved.

Body

Before the publication of *Silent Spring* in 1962, there was just one major piece of legislation:

• 1958 - <u>Delaney Clause</u> prohibits any carcinogenic additive from being added to processed foods.

Since the publication of *Silent Spring*, there has been a major shift in public consciousness about the environment. Years later, legislators have responded with the following:

- 1969 National Environmental Policy Act requires environmental impact statements for actions by federal agencies that effect the environment. Congress then created the <u>US Environmental Protection Agency (EPA)</u> to enforce compliance with this law.
- 1970 Occupational Safety and Health Act established the <u>National Institute of</u>
 <u>Occupational Safety and Health (NIOSH)</u> within the <u>Department of Health and</u>
 <u>Human Services (DHHS)</u> to develop mandatory health and safety standards for

- business, conduct research on occupational health problems and produce criteria identifying toxic substances and safe exposure levels for them.
- 1970 Clean Air Act, amended in 1977 and 1990 with National Emission Standards for Hazardous Air Pollutants (NESHAPS), regulates off-site contamination, that is, pollution outside one's facility.
- 1972 Clean Water Act, amended in 1972, 1977, 1986, and 1995, applies to off-site contamination.
- 1976 Resource Conservation and Recovery Act (RCRA) provides regulation for the on-site handling of toxic chemicals, that is, handling of toxic chemicals at one's facility.
- 1976 <u>Toxic Substances Control Act (TOSCA)</u> provides regulation to protect the public against toxic substances in consumer and industrial products.
- 1980 Comprehensive Emergency Response, Compensation and Liability Act
 (CERCLA), popularly known as "the Superfund Act," established the <u>Agency for Toxic Substances and Disease Registry (ATSDR)</u> within the Public Health Service (PHS), one of the agencies of the DHHS.
- 1986 <u>Superfund Amendments and Reauthorization Act (SARA)</u> added to the duties of the ATSDR the responsibility for developing and updating a list of toxic substances that pose the most significant threat to human health.
