Living Under Drones: Death, Injury and Trauma to Civilians from US Drone Practices in Pakistan

Description

This report describes research conducted by the International Human Rights and Conflict Resolution Clinic of Stanford Law School and the Global Justice Clinic at New York University School of Law. "Following nine months of intensive research — including two investigations in Pakistan, more than 130 interviews with victims, witnesses, and experts, and review of thousands of pages of documentation and media reporting — this report presents evidence of the damaging and counterproductive effects of current US drone strike policies.
