Data Feminism

Author(s)

Lauren Klein
Michele Claibourn

Year

2021

Description

In this installment of the "Bringing Ethics into the Conversation" series, Dr Lauren Klein (Associate Professor, English and Quantitative Theory & Methods, Emory University) discusses a way of thinking about data science and its communication that is informed by the past several decades of intersectional feminist activism and critical thought. Dr Klein was joined by Dr Michele Claibourn, political scientist and statistician at the University of Virginia's Frank Batten School of Leadership and Public Policy.
